UMESHA GUNASINGHE

Program Manager – AI Documentation Systems | Context Engineering | Technical Communication Lead

EXPERIENCE

Aug 2023
Aug 2025

LEAD TECHNICAL WRITER - USER EDUCATION

IFS R&D

| Colombo, Western Province, Sri Lanka

- Led AI-driven documentation transformation initiatives at C-level AI Incubators in establishing structured content systems for scalable, AI-consumable knowledge delivery
- Supported documentation delivery across 18+ releases and 45+ contributors, improving consistency and scalability
- Designed and improved doc-as-code workflows and content pipelines for structured knowledge delivery
- Built and governed documentation frameworks and standards across global teams
- Acted as a bridge between Product, Engineering, and Documentation to translate strategic goals into executable systems
- Enabled self-service knowledge systems through structured content, tooling, and training initiatives
- Owned and coordinated documentation initiatives as programs, tracking execution, dependencies, and delivery across teams
- Identified risks, blockers, and inefficiencies, and implemented corrective actions to ensure delivery continuity

Mar 2021
Aug 2023

SENIOR TECHNICAL WRITER

Wiley

| Colombo, Western Province, Sri Lanka

- Led technical communication strategy and enablement initiatives across 200+ stakeholders
- Established documentation practices and governance models to improve consistency and usability
- Created and maintained structured documentation aligned with product and user needs
- Contributed to shaping documentation strategy and scaling content operations

Sep 2017
Feb 2018

SENIOR TECHNICAL SALES ENGINEER

Wavenet

| Colombo, Western Province, Sri Lanka

- Created technical documentation, solution architectures, and RFP/RFI responses for telecom systems
- Collaborated with engineering teams to document system workflows and deployment approaches

Jul 2013
Dec 2015

SOLUTIONS ENGINEER/SOFTWARE ENGINEER - TECHNICAL SALES

WSO2

| Colombo, Western Province, Sri Lanka

- Delivered on-site customer engagements across India, the Netherlands, and the USA, leading quick-start program (QSP) training, development support, and technical consultation on enterprise integration architectures
- Produced technical documentation and architecture guides for middleware and integration platforms
- Supported pre-sales engineering through technical demos, documentation, and solution design

Jan 2011
Dec 2011

SOFTWARE ENGINEER

Calcey

| Colombo, Western Province, Sri Lanka

- Participated in development, testing, and documentation of software applications in agile environments

EDUCATION

Jan 2016
Jun 2017

MASTER OF BUSINESS ADMINISTRATION (MBA)

Asia e University, Malaysia

Feb 2008
Apr 2011

BSC (HONS) COMPUTING

Staffordshire University, United Kingdom

SUMMARY

Program-level technical communicator with 10+ years in enterprise software, specializing in AI-driven documentation systems, knowledge architecture, and scalable content operations.

Led AI-enabled documentation transformation initiatives at IFS, focusing on structuring technical context for machine consumption, improving self-service knowledge, and embedding documentation into product and release workflows.

Strong background in doc-as-code and cross-functional program execution across Product, Engineering, and UX. Experienced in translating strategic goals into scalable documentation systems that support both human users and AI-driven platforms.

Passionate about shaping the future of technical communication through AI-first design, context engineering, and enterprise knowledge systems.

Operating at the intersection of documentation, AI systems, and product strategy, with a focus on building context-aware knowledge systems for scalable, self-service experiences.

AI & Context Engineering

- Designed and contributed to the context layer for documentation systems, enabling structured content to be consumed by AI models and internal platforms
- Translated unstructured documentation into structured, context-rich knowledge systems for both human and AI consumption
- Defined and maintained metadata models, content schemas, and semantic structures to improve content retrieval, reuse, and consistency
- Structured technical content to support machine-readable and AI-consumable knowledge systems
- Designed and led AI-enabled documentation workflows to improve content discoverability and reuse
- Integrated doc-as-code pipelines and AI tooling (Confluence AI, structured frameworks) into documentation systems
- Resolved terminology and structural inconsistencies across documentation to ensure semantic clarity
- Focused on enabling self-service knowledge systems that scale across teams and AI-driven environments

SKILLS

- AI & Context Systems: AI-driven documentation systems, Context engineering, Metadata modeling, Semantic structuring, Knowledge modeling, Self-service knowledge platforms, Information architecture for AI, Generative AI (LLMs, AI agents)
- Documentation Strategy & Architecture: Documentation systems design, Content governance & standards, Structured writing, API documentation, Information architecture, Documentation QA
- Tooling & Workflows: Confluence, Git, Markdown, Doc-as-Code, ClickLearn
- Tools: Figma, Camtasia, Jira, Typora
- Ways of Working: Agile / Scrum, Cross-functional collaboration, Product & engineering alignment, AI-assisted documentation (ChatGPT, Copilot)

LANGUAGES

- English | Advanced
- German | A2 (progressing toward B1)
- Sinhala | Native
